

Home parenteral nutrition

Helping you to  
travel with ease.  
**On board with HPN.**

It's what **we know.**

**LloydsClinical**

Here at Lloyds Clinical, we understand that when you want to travel, but are reliant on HPN, just how important it is to have peace of mind. That's why, whether you're going abroad or staying here in the UK, we make it easier by providing all the medication and approved equipment you need ahead of your travels.

### You're in safe hands

To assist with the planning of your trip, we ensure smooth delivery of your HPN supplies. We send them to your home or departure port, in advance of your travels with durable, validated containers supplied for compounded HPN.

ALL WE ASK IS  
THAT YOU PROVIDE  
US WITH SIX WEEKS  
NOTICE BEFORE YOU  
TRAVEL

### Making your journey easier

We also organise the paperwork you need, appropriate for the destination you're traveling to. This hopefully will minimise any issues whilst going through security control checks.

The documents we provide will detail a list of all the medications and equipment you're carrying, such as PN and flushes.

There will be the appropriate forms you will need for your carrier of choice along with labels for your medication boxes.

To aid transit through security scanning, we will provide written information for x-raying your equipment and medications.

### The personal touch

To make sure we can give you the best possible service, please tell your Lloyds Clinical HPN Co-ordinator your travel plans six weeks before you go.

Once we've received notification and confirmation of the dates we will send you a travel pack which will include all relevant documentation associated with your treatment provided by Lloyds Clinical.

Patient Co-ordinator

## About Lloyds Clinical

We're one of the most experienced providers of specialist clinical care outside of hospital, in the UK.

For nearly 30 years, we've pioneered access to clinical therapies outside of hospital, in patients' homes and communities. Every day we're helping patients live independently and take control of their life.

We provide medication and specialist nursing for the greatest number of therapy areas and complex conditions, out of hospital.

Our success is measured by the quality of our outcomes. For patients we know it's the time and independence to live life to their potential alongside their condition, enabling time and flexibility to prioritise family life and work. For health professionals, it's finding smarter solutions to work more effectively with resources to do the best for their patients.

What we know, learn and share from treating more than 90,000 patients each year, inspires clinical breakthroughs for a changing world.
